Vscene

# ajenta

# Vscene

communicate • collaborate • educate

Vscene

Vscene, a service from Jisc and Ajenta, enhances teaching and learning, supports research and facilitates video collaboration. It enables seamless connectivity in a virtual meeting space, regardless of which technologies you are using.

[vscene.jisc.ac.uk](http://vscene.jisc.ac.uk)

# What is Vscene?

Developed specifically for the research and education sectors, Vscene is a videoconferencing service that removes geographical barriers and enables collaboration.

Vscene is a videoconferencing service that has evolved with the education and research sectors to deliver a seamless and intuitive service that meets the needs of its users. It allows you to establish links with other organisations or campuses, record lectures/classes, facilitate group work, assessments and feedback sessions or simply have a videoconference.

## Benefits

- Save time
- Reduce costs
- Reduce carbon footprint
- Easy global collaboration
- Increase student reach and participation.

Vscene enables remote students and those with mobility difficulties or other impairments to easily participate in learning

“Compared to the alternative of having lecturers travel to eight institutions, the benefits of Vscene are so great that the school simply couldn’t function without it.”

*Dr Christian Killow, Graduate School Co-ordinator,  
Scottish Universities Physics Alliance*

Vscene will save you time and reduce your costs from day one, with little or no training

## Save time and reduce costs

Using Vscene will save your organisation time and money as travel to conferences, meetings and workshops is reduced or even no longer needed. Your staff are able to have the same interactions and collaborations using Vscene as they would by attending a meeting. Using Vscene reduces their time away from work and significantly reduces the costs associated with travelling.

## Increase student reach and participation

Vscene facilitates new opportunities in teaching and learning as, when used as a virtual classroom environment, remote students or those with mobility difficulties or other impairments, are able to participate in learning using the Vscene platform.

# Jisc and Ajenta Partnership

Jisc and Ajenta are working in partnership to bring you the next evolution of Vscene. Ajenta will manage and run the service to ensure it remains a competitive and innovative platform, whilst also significantly developing the service to better meet user needs over the next 12 months. For more information about Ajenta visit [ajenta.net](http://ajenta.net).

## Costs

Vscene is currently available at no extra cost to HE, FE, research, PCDL and government funded schools as part of the HE Jisc subscription or through central funds. As part of the ongoing development of Vscene, a new version - Vscene 2.0 - will be launched in March 2018. The new, enhanced service will be available at a very competitive price.

“We have been using Vscene for an international project collaborating with Jisc and CERNET, the research and education network in China. Vscene brings everyone together for an easy to use, high quality and reliable face-to-face experience no matter where everyone is or what device they are using.”

*Andy Dallow, Solution Design, University of Nottingham*
